

Want to get rated

CRISIL Ratings has ratings on more than 25,400 large and mid-scale corporates and financial institutions. Our capabilities span the entire range of debt instruments. We improve access to funding for issuers and borrowers and help optimise their cost of funds. For investors and lenders, we supplement internal evaluation processes and benchmark credit quality across investment options. We help the markets function better and also assist regulators in measuring and managing credit risks at a systemic level. Our ratings are used in computation of capital adequacy in the banking sector and to determine the eligible investment pool for insurance companies, pension funds and provident funds. We have also rated or assessed over 110,000 Micro, Small and Medium Enterprises (MSMEs) in India.
